Personal Skills and Abilities

Teamwork

During my internship I worked as a team member as well as independently

Problem-Solving/Reasoning/Creativity

The truth is I like programming. I like it because it's a power full tool for solving problems and combine with artificial intelligence algorithms you can give more efficient walkthroughs at complex problems.

Willingness to Learn

It's always enjoyable to learning new stuff and by learning I meant reading and then implement.

Dedication/Hard-Working/Work Ethic/Tenacity

Always I work as hard as it needs to get my goal, and I never put a goal I can't achieve. Although I play by the rules, I like to helping other persons co-workers or competitors. I believe that only with teamwork and competing ourselves we can grow healthy

Interests and Hobbies

table tennis

Table tennis is enjoyable as you playing a chess game, but here you need to be in a good physical condition also. The triggering factors for me are:

you have to be 100% focused

you have to take fast decisions

you are building a strategy and at the same time you need to be adaptable at new factors

cycling

Cycling is like trying to achieve a goal(distance - time). You set the goal at the beginning and you know exactly what to do to achieve it

reading books

I like reading book about different subjects because is the easiest way learn and gain experience. But is event better to be there with you, and find my mentor there, and will he/she will be mentor I could work on his/her projects.
